• I feel as though the way many of the multiple choice questions were setup was non-advantageous to learning the subject matter. Many of the multiple choice questions felt like "gotcha" questions rather than a proof of understanding of course material. I understand that this is part of the textbook not the professor herself so perhaps by choosing a better selection of book and/or coursework may be beneficial for future classes. The professors assigned excel work was extremely helpful in an understanding of the subject matter. These assignments helped me understand the material far better than the book itself.

28 - The professor set high expectations for students in this course.
